Quick Start Guide	1

Hardware Connection

Step 1: Connect to the TV

Plug the TBS mini PC to your TV/Monitor HDMI input. If your TV/Monitor is without HDMI input, you can use a HDMI to RCA or HDMI to VGA converter for the connection.

Step 2: Turn on the TV/Monitor and select to display from the input connected with mini PC.

Step 3: Connect USB mouse/keyboard to the USB port directly, or if you're using wireless

mouse/keyboard/fly-air-mouse, connect the USB receiver which comes with your wireless mouse/keyboard/fly-air-mouse. Normally there is no need to install any driver, the mini PC will recognize the mouse/keyboard/fly-air-mouse automatically.

Step 4: Connect USB power cable to power adapter and input power to mini pc "DC" port. It will take a few seconds for mini PC to boot.

System Introduction

The Home Screen:

status, download status and so on.

System Setting

Click icon **Settings** to enter System Settings.

1. WiFi setting:

To connect to internet, you will need a wireless router in your home. Then follow these steps to connect to internet:

Enter settings, on top you will find "Wi-Fi" tap, switch to "ON" position. The tablet will scan for available Wi-Fi automatically. Find on the list your Wi-Fi and click to connect. It will ask for the password of your Wi-Fi setting. (Normally people will set up a password for their Wi-Fi router). Input password and click "connect". When you see "connected", it means your tablet has connected to your Wi-Fi router successfully and you can now browser to internet.

8. File Management:

Click icon to manage all files in the PC stick and external TF card. Keep pressing the any file's icon, there will be options for you to delete or copy the file.

System Reboot:

➢ TBS802A, TBS802B

There are 2 small holes on the end edge of the TBS802A/BS802B Android mini PC stick, one is indicator LED, and the other is reboot port. Use a paper clip or toothpick, keep pressing the reboot port, and power the TBS802A/TBS802B stick at the same time. Release the reboot port when the indicator LED is starting to flash, the TBS802A/TBS802B stick is starting reboot.

It will take about 3 minutes to finish reboot. When the indicator LED stops flashing and keeps lighting, it means reboot is finished. You just need to re-power the TBS802A/TBS802B stick to turn it on.

TBS8210 and TBS8211

There is a reboot key on the side edge of TBS8210/TBS8211 Android mini PC stick. Keep pressing it and power the TBS8210/TBS8211. Release the reboot port when you see the indicator LED is starting to flash, the TBS802A/TBS802B stick is starting reboot. It will take about 3 minutes to finish reboot. When the indicator LED stops flashing and keep lighting, it means reboot is finished. You just need to re-power the TBS8210/TBS8211 stick to turn it on.

For TBS8240

On the end edge of the TBS8240, you will see 2 small holes beside USB port, one of them is the reboot port. Use a paper clip or toothpick, keep pressing the reboot port, and power the TBS8240 Android Mini PC stick at the same time, it will be into the reboot mode. Use Fly air mouse or USB mouse to chose "reboot system now".

After reboot finishing, TBS8240 Android Mini PC stick will restart automatically.

Trouble shooting

If you encounter any problems, please look into the following trouble shouting guide first, if the problem still exist, try to contact us via support@tbspc.com

Problem	Solution
	- Check if the power adaptor is properly connected or the power adaptor
	may be damaged. Try another DC 5V 2A power adapter, keep in mind
No Power	nowadays most Android smartphones/tablets use the same DC 5V 2A
	mini USB output interface power adapter, so you can find replacement
	for power adapter easily.
No Picture	- check if the mini PC HDMI connector fits the TV/Monitor input firmly.
No sound	- check if the mini PC HDMI connector fits the TV/Monitor input firmly.
	- Check the mini PC volume setting.
	- Check your TV/Monitor volume setting.
Can't boot to	- Most likely need to update firmware. Contact us for how to do it.
System	
Cardt dawalaad	- The problem may be related to your Google account, try another
	Google account. If it still doesn't work, there are several alternative
Apps from Google	options to download Apps. You may download and install Apps from
play store	Getjar, 1Mobile Market or Amazon Appstore.

Important Notice:

It's strongly recommended to shut down the system by clicking

the power adapter. Otherwise it may damage the mini PC file system.
